

AECQS Controlled: Hypothetical Results Summary

INSTITUTIONAL PERFORMANCE REPORT | HYPOTHETICAL, BACKTESTED

Hypothetical backtest, Sep 4, 2012 - Sep 1, 2026, modeled \$25M starting balance, net of modeled costs. A systematic multi-strategy futures research configuration. Not audited. No live or paper track record exists. Not an offer or solicitation.

\$2.46B ENDING VALUE, BASE SETTING (MODELED \$25M)	38.8% CAGR (BASE SETTING)	-14.0% MAX CLOSED-DAY DRAWDOWN	1.97 SHARPE (SHOWN RUN)
---	-------------------------------------	--	-----------------------------------

Results under stress, \$25M start

Case	Ending value	CAGR	Max DD
Median of 15 tested walk-forward settings	\$2.55B	39.2%	-15.2%
Base setting	\$2.46B	38.8%	-14.0%
All modeled costs 1.5x	\$1.68B	35.1%	-14.5%
All modeled costs 2x	\$1.11B	31.1%	-17.5%
Without 2014 (best year)	about \$1.1B	about 34%	-14.0%
Later start (2016 first selection year, earlier run)	\$0.84B	29%	n/a

By starting balance (median of 15 settings)

Start	\$1M	\$10M	\$25M	\$50M	\$100M	\$250M
Ending value	\$0.42B	\$1.69B	\$2.55B	\$3.36B	\$3.86B	\$5.41B
CAGR	54.1%	44.3%	39.2%	35.1%	29.8%	24.6%
Max DD	-13.9%	-14.5%	-15.2%	-15.0%	-17.5%	-16.0%

What these figures are, and are not

Results are simulated with the benefit of hindsight. Selection is walk-forward on a rolling five-year window using prior data only, but the strategy components were discovered on the full history. In re-ordered histories (block bootstrap) the typical worst drawdown is near -18.5%, so the historical -14.0% should not be read as a likely future worst case. Costs are modeled from a square-root market-impact model supported by tick-data checks and published research, not from our own fills. Larger balances compound more slowly and capacity above about \$50M degrades results. **Provenance:** most of the return derives from systems shared with the company's Growth program whose frozen inputs are not independently rebuilt from raw data; the core and sleeve streams are rebuilt and match exactly. A reproducibility package exists and was re-executed on a separate machine; that confirms the computation, not that the results are achievable.

Important disclosures

HYPOTHETICAL PERFORMANCE - NOT ACTUAL TRADING. All figures are simulated backtest results. They are not audited, not investor returns and not assets under management. They include modeled commissions, exchange fees and market impact, which may differ from real execution, and they omit taxes, financing and any management or performance fees. Hypothetical results have inherent limitations; no representation is made that any account will or is likely to achieve similar results. Investing can result in total loss. Nothing here is an offer or solicitation, and it is not investment advice. Past simulated results do not predict future results. Ascenda Enterprise Capital LLC, Georgia.
