AECQS Controlled: Hypothetical Results Summary

STATUS: ACTIVE RESEARCH & DEVELOPMENT. Updated 12 October 2026. Figures are hypothetical, are revised as research continues, and will change.

Hypothetical backtest, September 2012 – September 2026, modeled $25 million starting balance, net of modeled costs. A systematic multi-strategy futures research configuration. Not audited. No live or paper track record exists. Not an offer or solicitation.

Ending value from $25M, drawdown limit 16%

Case	Ending value (median of 4 walk-forward settings)	CAGR	Max closed-day DD
Conservative: execution costs 33% above the central model	$1.5B	34%	within -16%
Central: modeled costs (rounded)	$2.0B	37%	within -16%
Lower-cost target: about 13% lower execution costs (NOT verified)	$2.3B - $2.8B	38 - 40%	within -16%

The central figure is rounded from a tested range of about $1.8B–$2.0B; about 40 volatility-sizing variants were tested, and a first-half/second-half check supports the approach (71% of 48 tested configurations beat the unsized version in the second half).

What the configuration contains

A rebuilt multi-strategy futures bundle; an NQ opening-drive sleeve; a short-horizon livestock sleeve; slow volatility-based de-risking (VIX 21-day average, never adds size); and a 16% closed-day drawdown limit. Settings are selected on prior data only (anchored walk-forward).

Limitations

Costs are modeled, not measured from live fills. The lower-cost case assumes execution costs about 13% below the central model and has not been verified. Capacity, margin, market impact and intraday liquidation feasibility are not verified; the equity universe carries survivorship-bias risk. Actual results would differ and could involve total loss.

HYPOTHETICAL PERFORMANCE — NOT ACTUAL TRADING. Simulated backtest results, net of modeled costs, prepared with the benefit of hindsight; not audited; not investor returns or assets under management. No representation is made that any account will or is likely to achieve similar results. Nothing herein is an offer or solicitation. Contact: izaiah@ascendaenterprisecapital.com
