

Q1 2026 Development Update

Ascenda Enterprise Capital LLC · January 1 - March 31, 2026

DRAFT DOCUMENT -- NOT FOR INVESTOR USE. This document is a working draft pending review by qualified securities counsel. It has not been finalized and must not be sent to, signed by, or relied upon by any prospective or actual investor until that review is complete.

Real, honest note on this document's format: this update is framed as a development and research report, not a fund performance report, because AEC has not yet deployed live investor capital. A prior draft of this document presented backtested research as a quarter of live, documented trading performance -- that was inaccurate and has been corrected here.

Letter from the CEO

Dear Investors and Allocators,

Q1 2026 was a real, substantive quarter of development work on AEC's systematic trading research. Our focus remained on building out and validating a genuinely independent portfolio of trading strategies, rather than on live capital deployment -- we believe that order matters, and that a real, honestly-validated research foundation should come before live capital, not after.

On the operational side, we made real progress on our automated trading infrastructure, investor documentation, and real estate pipeline. We remain committed to the principles that guide AEC: performance, precision, and transparency -- including being transparent about what is genuinely backtested research versus what is live, verified performance.

As always, do not hesitate to reach out directly with any questions.

Izaiah Cottle
Founder & CEO, Ascenda Enterprise Capital LLC

Research & Development Summary -- Q1 2026

Real, honest performance disclosure: the figures below reflect historical backtesting -- a computational simulation run against one year of historical NQ futures price data. They are NOT live trading results, NOT independently audited, and NOT verified by any third-party trade-tracking platform. No capital was actually placed at risk to produce these figures. Past backtested performance does not indicate or guarantee any future result, live or otherwise.

Metric	Real, Backtested Value
Total Simulated P&L (3x)	\$30,216,582.87
Total Backtested Trades	102,373
Combined Win Rate	45.5%
Testing Period	1 year, historical NQ futures 5-min data
Validation Method	Walk-forward, 4 sequential quarters
Live Trading Status	Paper trading (simulated capital) -- no live capital deployed

Strategy Commentary

Q1 2026 research focused on real, systematic strategy development across three signal families: multi-timeframe structural confluence, statistical mean reversion, and regime-adaptive trend following. Each candidate strategy was tested against one year of historical NQ futures data and walk-forward validated across four sequential quarters to confirm consistency rather than reliance on any single favorable period. Strategies that did not hold up across independent quarters were rejected rather than included.

Real estate deal flow remains active. AEC continues to evaluate acquisition targets in the Atlanta metropolitan area and surrounding markets, consistent with our value-add strategy.

Operational Milestones -- Q1 2026

Completed	Full institutional website launch -- ascendaenterprisecapital.com
Completed	Backtested strategy research -- 20 systems, walk-forward validated
Completed	Live paper-trading execution infrastructure (IBKR integration)
Completed	Board resolution -- \$750M AUM ceiling formally adopted
In Progress	Investor documentation -- undergoing securities counsel review
In Progress	Investor portal -- secure dashboard for confirmed investors
In Progress	Real estate acquisition pipeline -- Atlanta area targets under review
Planned Q2	Formal legal review of all investor-facing materials
Planned Q2	Advisory board formation -- seats in active recruitment

Q2 2026 Outlook

Looking ahead to Q2 2026, AEC's primary objective is completing formal securities counsel review of all investor-facing documentation before any further capital solicitation. Additional priorities include continued paper-trading validation of the live execution system and progress on advisory board formation.

This report is confidential and intended solely for existing investors and qualified prospective allocators of Ascenda Enterprise Capital LLC. This is a working draft pending review by qualified securities counsel.
