ASCENDA ENTERPRISE CAPITAL LLC

AECQS Controlled: Hypothetical Results Summary

STATUS: ACTIVE RESEARCH & DEVELOPMENT. Updated 12 October 2026. Figures are hypothetical, are revised as research continues, and will change.

Hypothetical backtest, September 2012 – September 2026, net of modeled costs. Central case: **$1.2B ending value from a modeled $25M start (about 33% CAGR), worst of four walk-forward settings $1.0B, drawdown limit 16%**. Costs grow with account size: market impact is re-charged each day on the current account value. Not audited. No live or paper track record exists. Not an offer or solicitation.

Ending value by starting capital

Start	Ending value (costs grow with account size)	CAGR	Worst of 4 settings	Max closed-day DD
$1M	$123M	42%	$108M	within -16%
$5M	$307M	35%	$271M	within -16%
$10M	$523M	33%	$465M	within -16%
$25M	$1.23B	33%	$986M	within -16%
$50M	$1.49B	28%	$1.18B	within -16%
$100M	$1.87B	24%	$1.47B	within -16%
$200M	$2.31B	19%	$1.87B	within -16%
$300M	$2.76B	18%	$2.24B	within -16%
$500M	$3.46B	15%	$2.83B	within -16%
$700M	$4.18B	14%	$3.41B	within -16%
$1B	$4.95B	12%	$4.05B	within -16%

Payout system: constant capital, profits withdrawn

Capital	Income per year	Per month	Return on capital	Worst DD on capital
$1M	$0.4M	$0.0M	39%	-16.0%
$5M	$1.9M	$0.2M	39%	-15.9%
$10M	$3.2M	$0.3M	32%	-15.3%
$25M	$7.6M	$0.6M	31%	-15.9%
$50M	$15M	$1.3M	31%	-15.7%
$100M	$32M	$2.7M	32%	-15.8%
$200M	$54M	$4.5M	27%	-15.9%
$300M	$69M	$5.7M	23%	-15.0%
$500M	$98M	$8.2M	20%	-15.6%

Returns on capital fall as capital grows because of market-impact and capacity limits. Median of four walk-forward settings. Payout rows for $1M–$25M use the lowest-cost data available and are approximate.

What the configuration contains

A multi-strategy futures bundle reduced to the components that remain profitable at size; an NQ opening-drive sleeve; a short-horizon livestock sleeve; slow volatility-based de-risking (VIX 21-day average, never adds size); and a 16% closed-day drawdown limit. Settings are selected on prior data only (anchored walk-forward); the reduced component

set was chosen on the same history, and many variants were tried.

Limitations

Costs are modeled, not measured from live fills. Capacity, margin, market impact and intraday liquidation feasibility are not verified; the equity universe carries survivorship-bias risk. Component selection and sizing were optimized on the same history. Actual results would differ and could involve total loss.

HYPOTHETICAL PERFORMANCE — NOT ACTUAL TRADING. Simulated backtest results, net of modeled costs, prepared with the benefit of hindsight; not audited; not investor returns or assets under management. No representation is made that any account will or is likely to achieve similar results. Nothing herein is an offer or solicitation. Contact: izaiah@ascendaenterprisecapital.com
